

RAD-Phobos Series

Serializer and Deserializer Media Converter / Repeater

The RAD-Phobos series converts, repeats, splits and aggregates SerDes links. RAD-Phobos helps equalize the GMSL2 or FPD-Link III interface to extend the usable range from sensor to controller. The device also allows you to monitor the lock and link status for the input and output video ports.

The RAD-Phobos allows you to duplicate or translate a SerDes stream to another video port with the industry's best latency for such video duplication. Custom device examples include sensor data using shielded twisted pair to Coax conversion. Configurable address and link speed are achieved at power up for forward channel linking.

When paired with Intrepid devices the Vehicle Spy Enterprise software can time align the I2C bus reading, writing and polling of data with CAN-FD, Ethernet and Video images.

Use Cases

- Extend range over Coax or STP
- Convert between SerDes technologies
- Split single camera to multiple outputs
- Power over Coax Injector
- Perform and validate cable integrity for optimal link performance
- Aggregate multiple cameras onto a single output
- Pattern Generator to validate pixel formats or bandwidth
- Access to GPIO and Frame Sync signal*
- Physical re-mapping of GPIO, evaluate multiple vendors' devices*
- External Frame Sync Generation / Validation*

A completely standalone mode is possible using Texas Instruments Analog LaunchPad (ALP) software or Maximum Integrated GMSL SerDes GUI tools with respective 3rd party hardware interfaces.

Features

- Input and Output: FAKRA Code Z (Water Blue)
- Configurable I2C addresses and link modes
- GPIO passthrough or remapped between deserializer and serializer possible
- Power over Coax Injector (not supported on all versions)
- Input Voltage Range: 5-40V
- Supports full bandwidth across SerDes link
- Status LEDs report Link/Lock and Error states
- Compact for portability
- Rugged extruded aluminum enclosure

*Optional use cases check with Intrepid

RAD-Phobos Series

Use Case: Extend Coax Working Distance Between Camera / Controller

Power-Over-Coax as Pass-Thru or Supply to Camera/Sensor

Use Case: Camera Splitter / Camera TAP to Data Logger - FPD or GMSL

RAD-Phobos Series

Use Case: Virtual Cable Tester, Vendor Application

Use Case: Convert between FPD Link III STP and GMSL2 Coax

Power-over-coax as pass-thru or supply to camera / sensor.

RAD-Phobos Series

Use Case: Pattern Generator to Validate Pixel Formats or Bandwidth

Use Case: Aggregating Multiple Cameras onto a Single Output

Power-over-coax from VBAT to camera / sensor.

Ordering Information

Part Number	Description
RAD-PHOBOS-F3-JAE-GL2-FRA	FPD-Link III to GMSL2 Media Converter
RAD-PHOBOS-GL2-FRA-GL2-FRA	GMSL2 Coax Media Converter

Specifications subject to change; please contact Intrepid for the latest information. All trademarks are the property of their respective owners.
