Bot and assistants

Software *beyond expectations*

Energy Systems Bot

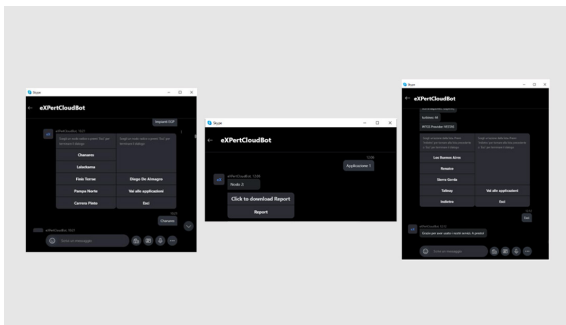

For a company specializing in large-scale industrial plant automation, we developed a chatbot for accessing operational and performance data of the plants. The bot allows interaction through multiple-choice cards to navigate between plants, view textual data, images, and generate reports in PDF format.

2 Communication Channels

3 Types of Information

1 Dynamic Navigation Tree

Smart Thermostats

2 Voice Assistants

4 Device Families

24 Available Commands
