

## **ABOUT TEORESİ MEDTECH**

Teoresi MedTech is the company within Teoresi Group (an international group founded in Turin in 1987, with a presence in Italy, Germany, the United States and Switzerland) dedicated to the Life Sciences sector. Established through the Group's investments in Life Sciences and its 2023 acquisition of Bologna-based MediCon Ingegneria, Teoresi MedTech aims to be a trusted industrial partner for manufacturers of *medical devices* and healthcare solutions, supporting them from requirements analysis, research and design through to production, risk management and certification.

Combining expertise in hardware, firmware, software, cloud, artificial intelligence, verification, validation and certification, the company develops medical devices and Digital Health solutions, supporting the entire product life cycle through ISO 13485-certified processes.

Teoresi MedTech's expertise spans cutting-edge technologies shaping the future of medicine, including: wearable devices for the continuous monitoring of elderly patients or those with chronic conditions; in vitro and Point-of-Care diagnostics, such as portable, non-invasive technologies for the immediate analysis of biomarkers; solutions for extracorporeal blood treatment; AI & Medical Imaging, AI-guided telerehabilitation platforms and remote medical consultations; virtual, augmented and *mixed reality* applications for medical and surgical training; AI architectures and robotics to support active ageing and health and social care.
